**Main Chat:**

Eric Ishida

I can help you with the rollout plan for EMEA as I've been working closely this week with the local marketing team to get the timings from the external AD agency and media buying team.

That would be a great help, I will call you to discuss at 12.

I've made a start with APAC and LATAM, now I'm just running through the plan for US.

That's great. I will collate all the materials from the media agency for buying locations, footfall verses media costs. I presume the plan is still to look for live locations to bring the campaign to life?

The goal is still for each local marketing team to be able to target audience segments

I asked the client to send her feedback by EOD.

Or tomorrow?

**Notes**

The shift to remote work and e-commerce led to a boom in digital tools and services, as companies looked for new ways to reach customers and enhance their online presence.

In addition to technological advancements, businesses also placed greater emphasis on sustainability, social responsibility, and diversity, equity, and inclusion. This shift reflected not only a recognition of the importance of these issues, but also a recognition of their potential to drive growth and enhance reputation.
