ETHICS within AI

Microsoft integrates AI into its operations with a strong emphasis on ethics and responsibility. The guiding principles of this approach are as follows:

Fairness

Microsoft aims to eliminate bias and ensure equal treatment for all users.

Privacy & Security

Your data is protected. During both the training and post-deployment phases, Microsoft places a strong emphasis on protecting user details.

Transparency

Microsoft believes in keeping users informed about how the AI systems work and the intended purposes.

Accountability

Ethical and legal standards are at the forefront, with AI developers and designers responsible for their creations.

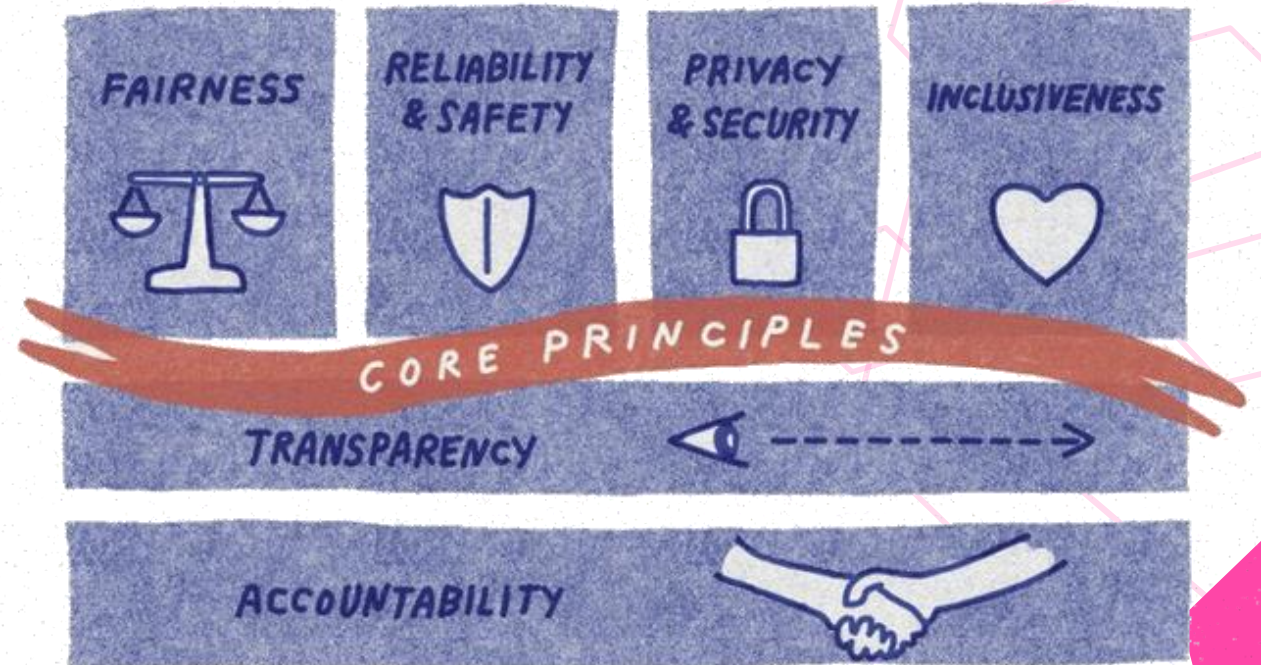

Inclusiveness

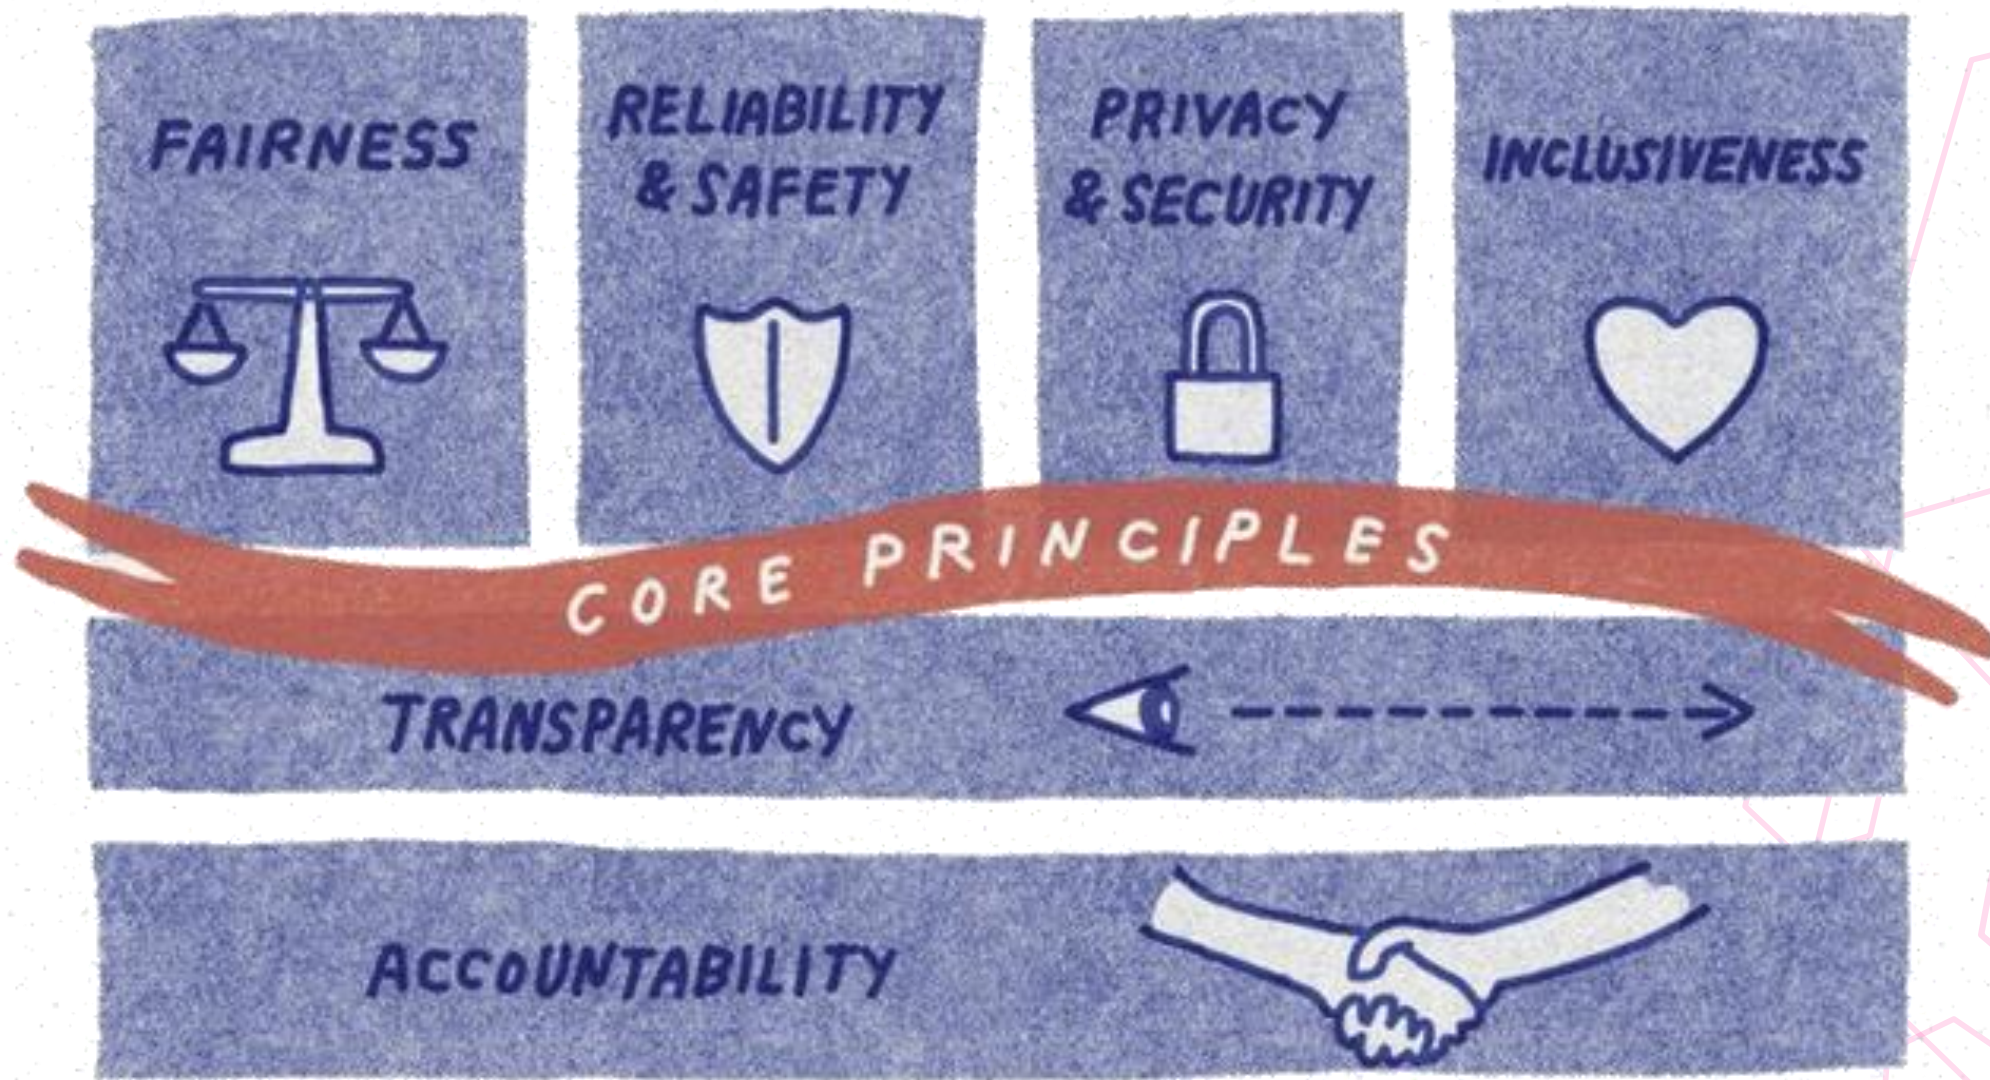

AI tools are designed to be accessible and useful to everyone, regardless of physical ability, gender, or ethnicity.

Reliability & Safety

Rigorous testing ensures that Microsoft's AI works consistently and securely.

AI Tools (with/from Microsoft)

Public: ChatGPT

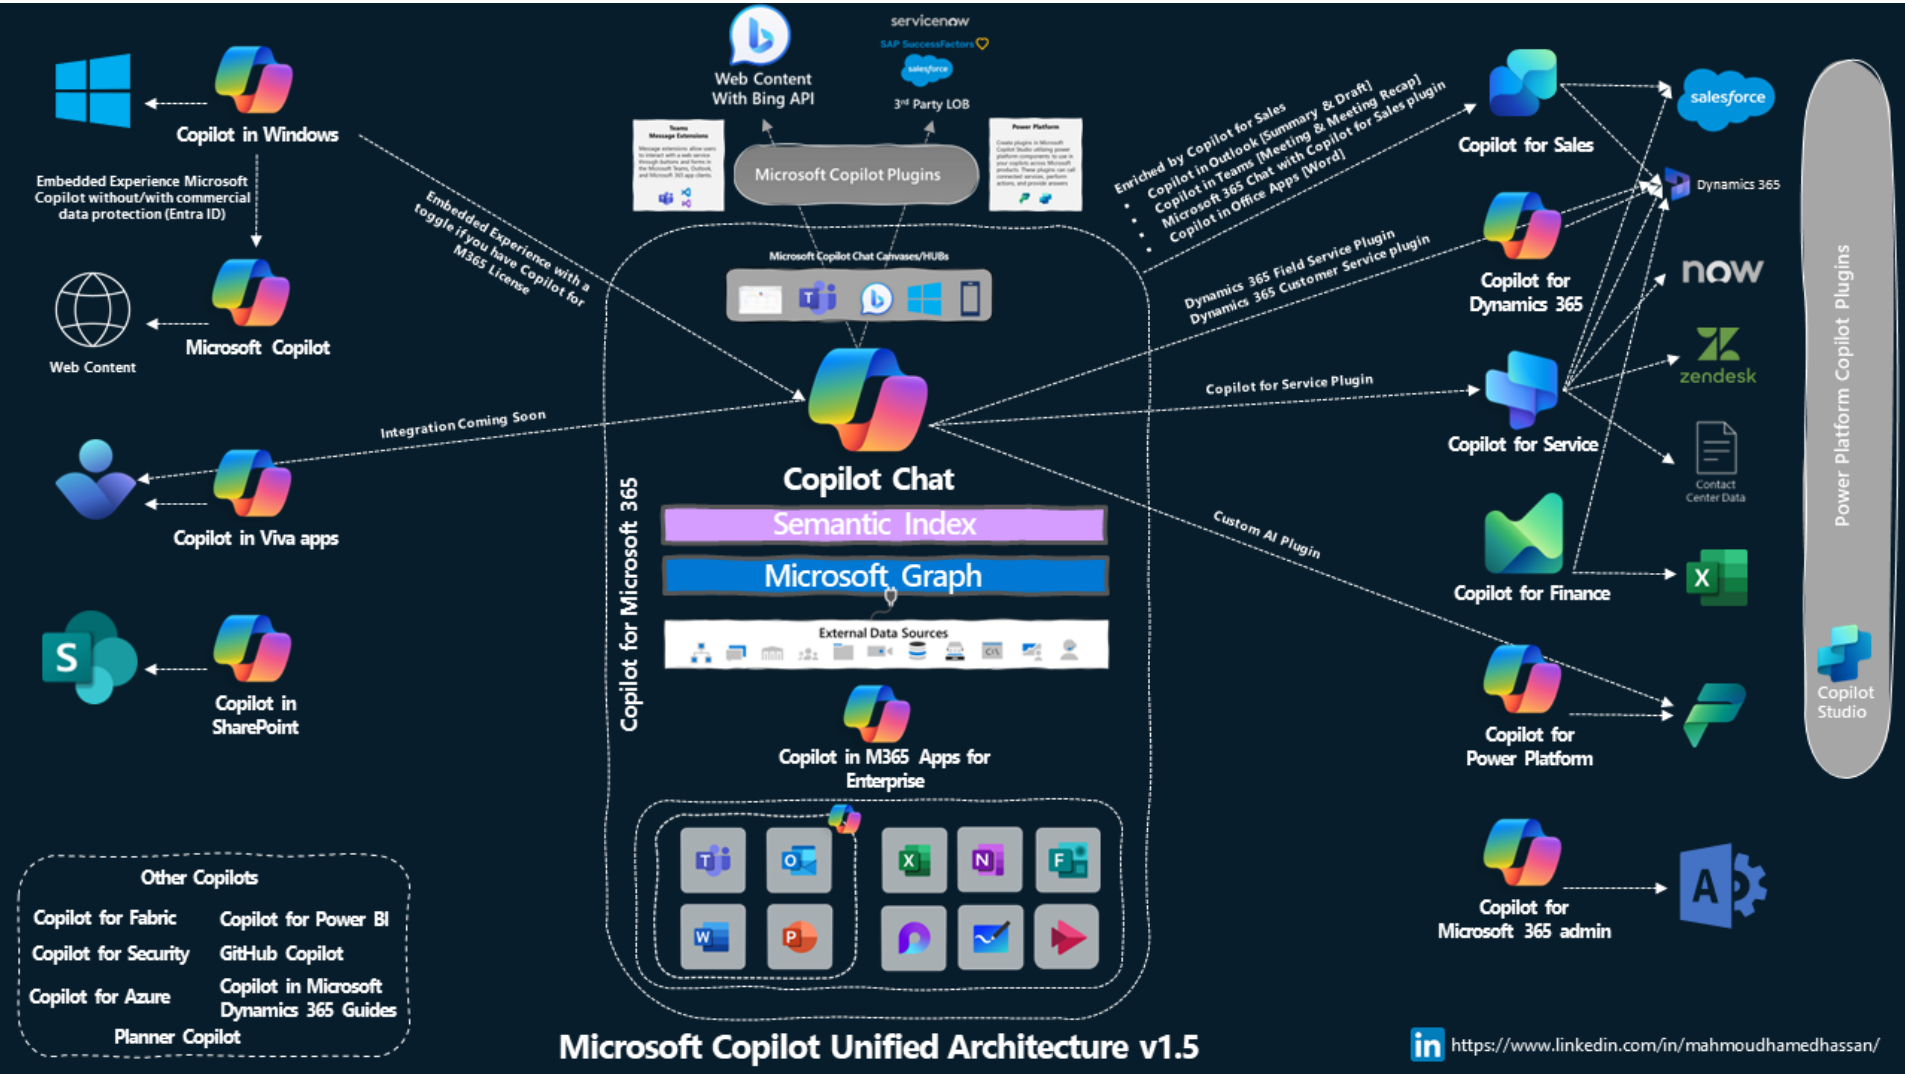

Private: Microsoft Copilot

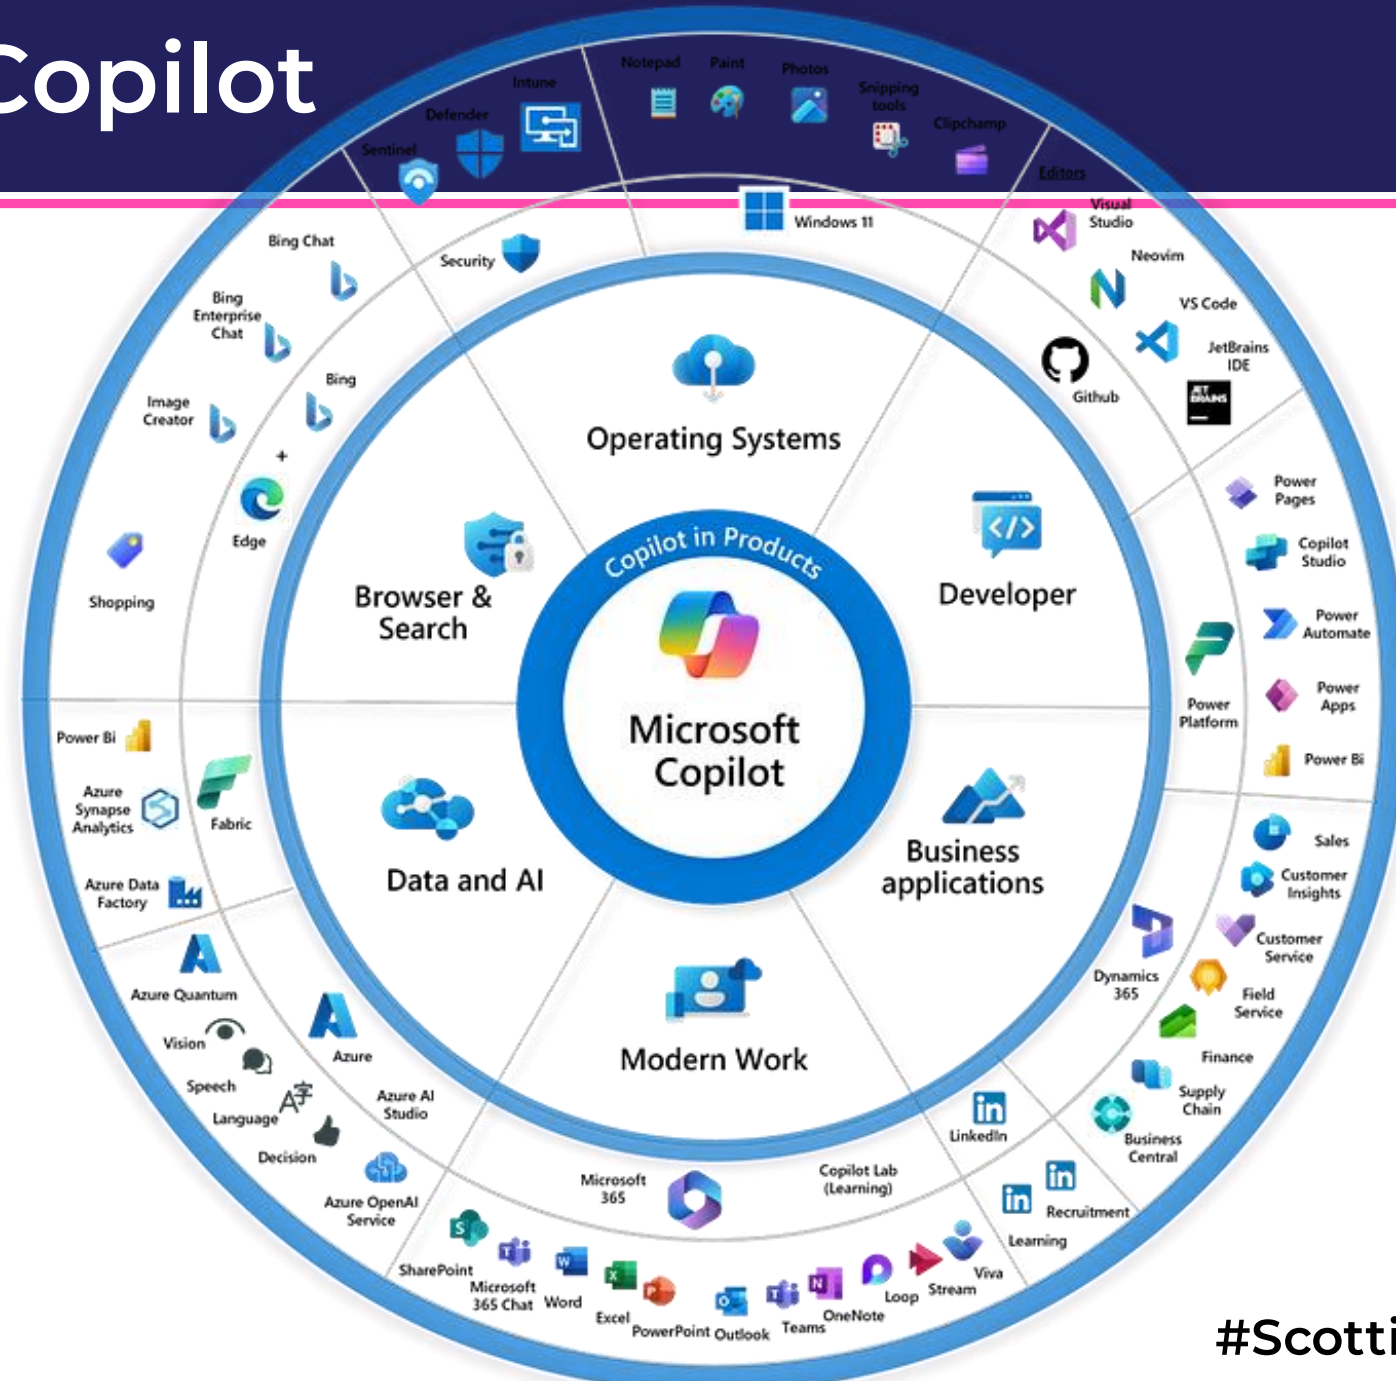

Private: Microsoft Copilot with Bing (protected)

Microsoft Copilot

DEMO / SHOWCASE

Microsoft Copilot

When does Microsoft 365 Copilot make sense for me?

M365 Copilot

- Working with internal documents (Word, PDF, etc.)
- Create presentations based on e.g. OneNote, Word, etc.
- Teams Meeting Summaries
- Working with company files in general

Copilot with Bing

- Write an email
- Writing a first draft
- Ask general questions

Thank you! – Lets connect
