Screenshot of Microsoft Teams showing the new Channel design.

The main window displays the "Alexandria Project" channel. The left sidebar shows pinned teams like "Alexandria Project" and "Design" under "Pinned", and other teams like "Contoso", "General", and "Alexandria Project" under "Your teams".

In the "Posts" tab, a message from Cecil Folk at 9:30 AM reads: "Preparing materials. Let's make sure that our marketing material for the upcoming launch is ready for stakeholders next week. Please reply with a quick update on your progress." Below it, a message from Mona Kane at 1:23 PM says: "All is good on my end. We have a design review tomorrow, and then we'll be in good shape. We had to make some edits for the client. She initially didn't want us to reference any of the competition, but after looking at the work we did for another client, she agreed to go in that direction. We've already made the adjustments." A reply from Colin Ballinger at 1:25 PM asks for slides. Kayo Miwa at 1:29 PM says they're helping Babek and Beth with studio production work.

A context menu is open over the first message, showing options: Start a new post, Post, Announcement, Copy link, Pin, Pop out conversation, Save this message, Translate, Share to Outlook, and More actions.

The right pane shows the "In this channel" section with a list of people (208) and a description: "Channel for the Alexandria launch planning". A secondary window titled "Preparing materials" is also visible, showing the same conversation between Cecil, Mona, and Colin.

Hey Daniela, Krystal is looking for us to share an update with the client on Friday...

I wasn't sure if you were feeling ready yet? I know there was a lot of feedback coming out of last week's review

Don't worry, the team should be ready by then. I'm confident this next review will go well given that the last review was mostly minor solve-able details. The team has been pretty awesome and jamming.

The client wasn't expecting us to be ready until middle of October

Thank you for always being so positive!

I will let Krystal know

Mona Kane 1:23 PM
All good from me, we have a design review tomorrow and then should be in good shape. We had to do some edits for the client since she originally didn't want us to reference any competition but after looking at the work we did for the other client from last month who wanted promotional material, she's more on board with that

The Case for Inclusive Design

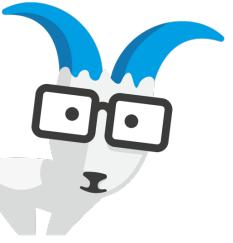

There are 7.4 billion people in the world. Our ambition is to create products that are physically, cognitively, and emotionally appropriate for each of them. It starts with seeing human diversity as a resource for better designs.
