Commsverse

What is a channel?

Lets talk about the basics

Commsverse

audiocodes

Landis
Technologies LLC

What is a Teams Channel?

- One or multiple channels per Team
- All channels allow
 - Chat
 - Files
 - Apps

Standard vs. private vs. shared

Standard

- open for all Team members

Private

- For a subset of Team members

Shared

- Selected users and teams can be members

Standard vs. private vs. shared (technical)

SharePoint

- Standard = SharePoint Master-SiteCollection of Teams Site
- Private
 - Standalone SiteCollection
- Shared
 - Standalone SiteCollection

Standard vs. private vs. shared (technical)

Guest access

Standard = Guest access can be disabled / enabled per Group

Private

- Relays on Teams settings
- Guest must be part of the team

Shared

- Relays on Teams settings
- Guest don't have to be a guest in the whole Team

The new kid - shared channels

People
Teams
Teams you own

Use cases - regular channels

Full Team collaboration

Invite guests

Regular teamwork without limitations

Use cases - private channel

Private content shared with specific people

Only for a subset of the Team members

(!!) Full Team membership required

Use cases - shared channels

Internal projects with multiple people for a single aspect

Shared and long term collaboration with external partners

Work together

without tenant switching

Automatic member management

Scale easily

Decission tree (you need a channel)

Thank you! - Let's connect
