BUILDING YOUR FIRST AGENT IN COPILOT STUDIO

FROM IDEA TO IMPACT

I LOVE HIKING IN THE ALPS, GOOD BEER, AND BUILDING SMART AGENTS!

GIPFEL ZIEL (PEAK GOAL)

IMPACT (THAT'S THE POINT!)

HI, I'M MICHAEL PLETTNER FROM MUNICH!

LET'S TURN YOUR IDEA INTO AN AGENT THAT MAKES A REAL IMPACT.

Erst die Arbeit, dann das Vergnügen!
(First work, then pleasure!)

BUILD OR EXTEND?

Should you build a standalone agent or extend Microsoft 365 Copilot?

STANDALONE AGENT

EXTEND M365 COPILOT

READY TO MOVE FROM CONSUMING AI TO CREATING IT? COPILOT STUDIO PUTS THE POWER OF AGENT DEVELOPMENT IN YOUR HANDS – NO CODING DEGREE REQUIRED!

OUR MISSION:

Build an IT Support Agent that helps employees solve common tech issues without flooding your helpdesk.

THE AGENT DEVELOPMENT JOURNEY

BUILT IN BAVARIA. INSPIRED BY NATURE. FOCUSED ON IMPACT.

KLARHEIT (CLARITY)
Make it simple,

GEMÜTLICHKEIT (COMFORT)
Build agents people

AUSDAUER (PERSISTENCE)
Iterate, improve,

VERTRAUEN (TRUST)
Secure, reliable,

CONNECT TO WHAT MATTERS

MAKE YOUR AGENT POWERFUL WITH REAL DATA & ACTIONS

SHAREPOINT
Knowledge bases, FAQs, and policies – always up to date.

MICROSOFT GRAPH
User info, profiles, and context to personalize interactions.

DATAVERSE
Track interactions, store data, and build custom reporting.

POWER AUTOMATE
Create tickets in ServiceNow, Jira, or any system with flow.

AZURE OPENAI
Intelligent troubleshooting and natural language understanding beyond documented solutions.

THE ESSENTIALS

- ✓ Craft effective prompts & instructions
- ✓ Design smart topics, triggers & flows
- ✓ Manage knowledge sources
- ✓ Handle complex scenarios with actions & plugins
- ✓ Ensure security, compliance & governance
- ✓ Set up escalation paths when human help is needed

NO CODE. NO PROBLEM. BIG IMPACT!

YOU'LL WALK AWAY WITH:

- ✓ A working agent blueprint you can use right away
- ✓ Practical skills to build, connect, and deploy
- ✓ Best practices to avoid common pitfalls
- ✓ Strategies for adoption, measurement & success

VON DER IDEE ZUM IMPACT!
(FROM IDEA TO IMPACT!)

Decode AI

Declarative Agents

What is a Declarative Agent?

Copilot – but with its own focus

Own knowledge and own actions – no LLM training, no model development.

Connect knowledge sources

SharePoint, websites, files, custom databases (via Connector)

Execute actions

Create ticket, fill out form, query data, send email

Custom personality

System instruction defines the tone, focus, and boundaries of the agent

Deployment

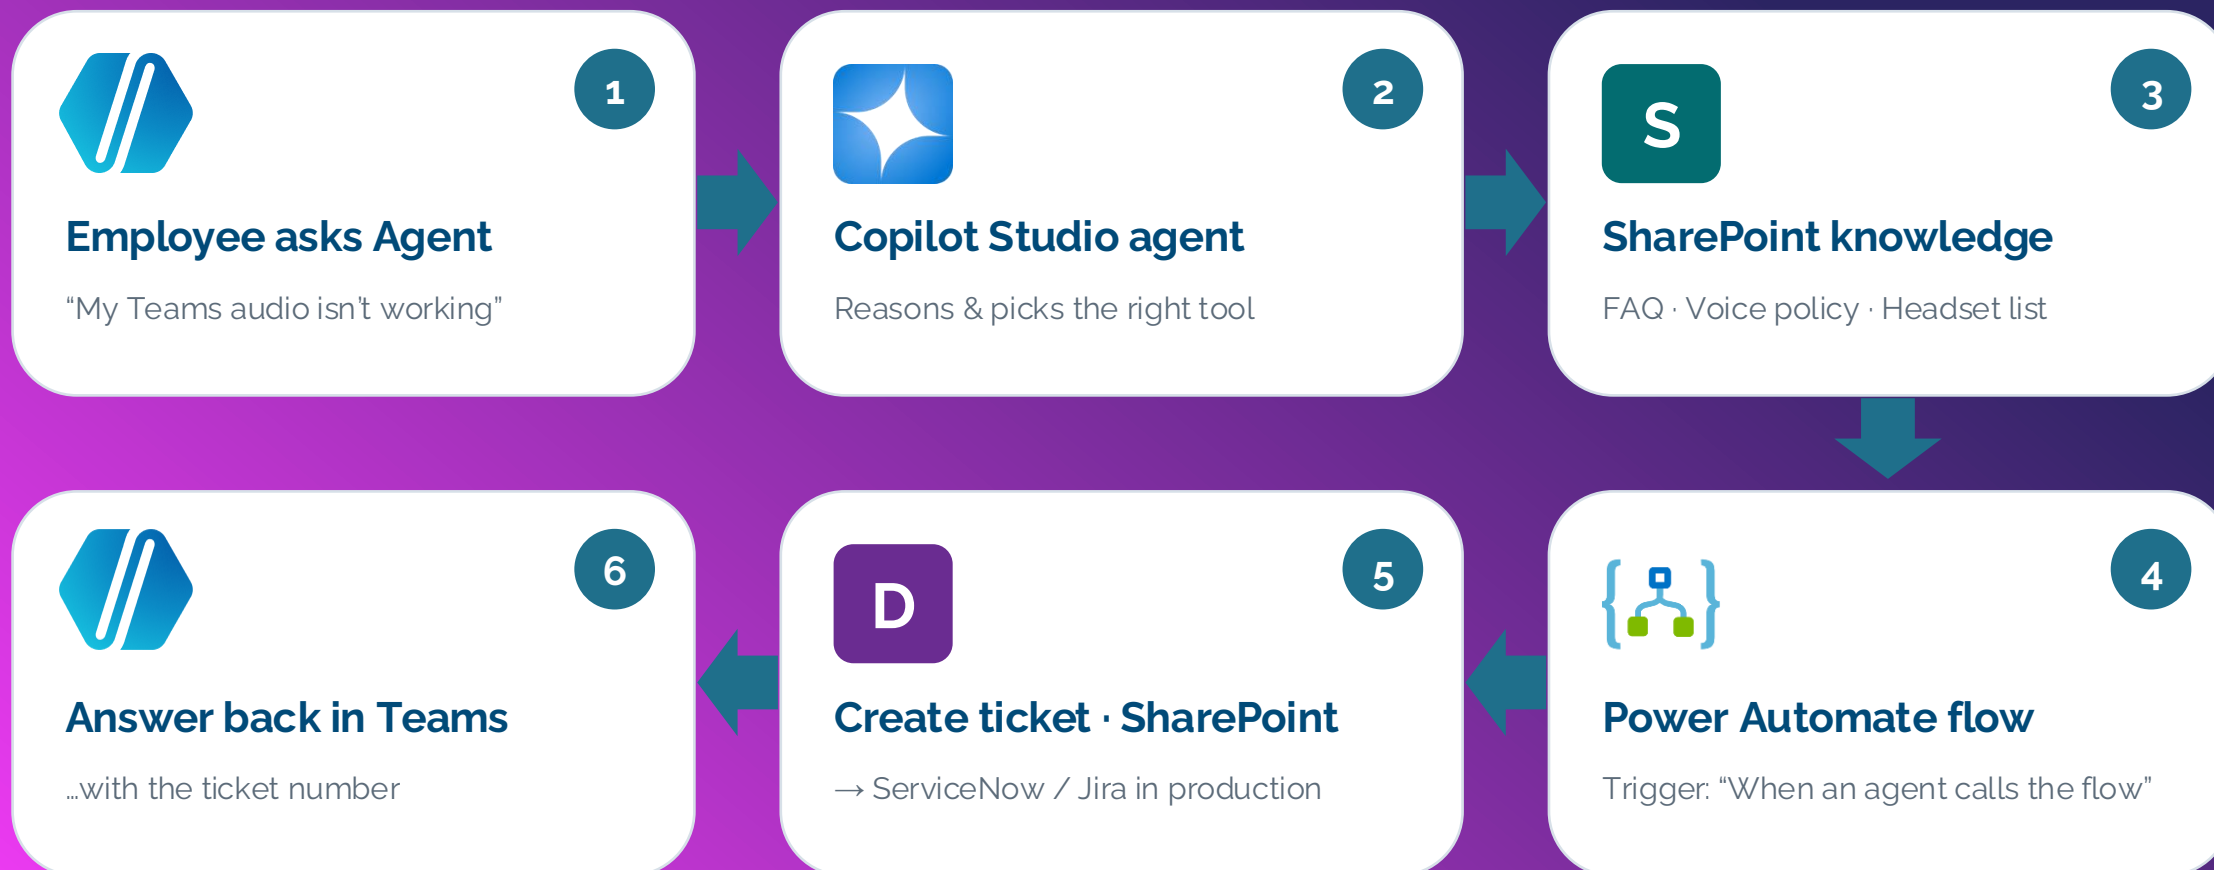

- Microsoft Teams
- M365 Copilot Chat
- SharePoint page
- As a standalone app

Practical Examples

- HR FAQ agent based on SharePoint
- IT helpdesk with ticket creation
- Onboarding agent for new employees
- Sales agent with CRM integration

Demo Flow

How the Teams Support Buddy handles a request at runtime

DEMO

COPILOT STUDIO

Let's
build something.

Agents. Flows. Tools. Live.

THE ONE THING TO REMEMBER

A good agent is
narrow, well-
instructed,
and knows its
limits.

Not the one that does everything.
